

**NATAE**  
North African Transition  
to AgroEcology

**WEBINAR**  
in French  
and English

**Between traditional and scientific knowledge, how can we improve the resilience of peri-oases systems?**

**23<sup>rd</sup> NOVEMBER 2023**

**10:00 - 12:00 (CET)**

**REGISTRATION MANDATORY**

Oases are unique agro-ecosystems, true models of sustainable development, built and maintained for generations through the rigorous management of natural resources. While many traditional oases are in decline, suffering the effects of global warming, a rural exodus and increasing urbanisation - leading to the disappearance of know-how and certain parts of the oasis cultural heritage - new palm groves are, on the other hand, growing on the outskirts of towns, as a result of private initiatives or public support. These palm groves face many challenges (water management, labour, soil fertility, drought, etc.), and in this webinar we will see how traditional knowledge can be re-mobilised, and combined with scientific knowledge and innovations, to improve the resilience of peri-oasis systems.

This webinar is organised as part of the [NATAE](#) project and the [MEDAE](#) network (MEDiterranean multiactor network on AgroEcology)

**AGENDA**

- 10:00 **Opening**
- 10:10 **Issues and dynamics of oasis and peri-oasis systems**  
Adel Moulai, teacher – Laghouat University
- 10:20 **Bringing farmers together and remobilising traditional knowledge to develop new palm groves in Laghouat (Algeria)**  
Mohammed Brik, president - El Argoub association
- 10:35 **Discussion**
- 10:50 **Technical assistance and public support in the peri-oasis systems of Ghardaïa (Algeria)**  
Mohamed Tartoura, manager - National Plant Protection Institute of Ghardaïa
- 11:05 **Validation of ancestral practices and innovations in oasis systems (Kebili, Tunisia)**  
Mehdi Ben Mimoun, Professor - National Agronomic Institute of Tunisia
- 11:20 **Discussion**
- 12:00 **End of webinar**

**23<sup>rd</sup> November 2023**  
10:00 – 12:00 (CET)
